Welcome to the world of Midland electronics

Congratulations on your purchase of a high quality MIDLAND product. Your 2-way radio represents the state-of-the-art in high-tech engineering. Designed for GMRS (General Mobile Radio Service) operation, this compact package is big in performance. It is a quality piece of electronic equipment, skillfully constructed with the finest components. The circuitry is all solid-state and mounted on a rugged printed circuit board. Your two-way radio is designed for reliable and trouble-free performance for years to come.

**LCD DISPLAY**

1. **TRANSMIT (TX) ICON** – Indicates radio is transmitting a signal.
2. **VOLUME METER** – Indicates the volume setting of the radio.
3. **RECEIVE (RX) ICON** – Indicates radio is receiving a transmission.
4. **LOW BATTERY ICON** – Indicates the battery level is low.
5. **VOX ICON** – Indicates when VOX mode is active.
6. **CHANNEL NUMBER** – Changes from 1~22 on GMRS/FRS band.

**CONTROLS**

7. **PTT Button** – Press and hold to transmit voice communication.
8. **SCAN/LOCK Button** – Press to enter SCAN mode. Press and hold to turn KEY LOCK on/off.
9. **UP ▲ and DOWN ▼ Button** – Make adjustments in MENU mode.
10. **SPEAKER** – Built-in speaker.
11. **ANTENNA**
12. **EXTERNAL SPEAKER/MIC/CHG. JACK**
13. **POWER / MODE Button** – Press and hold for at least 3 seconds to turn the radio on/off. Press momentarily to access Menu mode.
14. **MIC** – Built-in microphone.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device does not cause harmful interference, and (2) this radio must accept any interference that may cause undesired operation.

To maintain compliance with FCC’s RF exposure guidelines, for body-worn operation, this radio has been tested and meets the FCC RF exposure guidelines when used with Midland Radio Corp. accessories supplied or designated for this product. Use of other accessories may not ensure compliance with FCC RF exposure guidelines.
IMPORTANT NOTICE, FCC LICENSE REQUIRED FOR GMRS OPERATION (Only Applicable for GMRS Radio Use in the United States)

The LXT112 Series operates on GMRS (General Mobile Radio Service) frequencies which require an FCC (Federal Communications Commission) license. You must be licensed prior to operating on channels 1 - 7 or 15 - 22, which comprise the GMRS channels of the LXT112 Series. Serious penalties could result for unlicensed use of GMRS channels, in violation of FCC rules, as stipulated in the Communications Act's Sections 501 and 502 (amended).

You will be issued a call sign by the FCC which should be used for station identification when operating the radio on GMRS channels. You should also cooperate by engaging in permissible transmissions only, avoiding channel interference with other GMRS users, and being prudent with the length of their transmission time.

To obtain a license or ask questions about the license application, contact the FCC at 1-888-CALL FCC or go to the FCC's website: http://www.fcc.gov and request form 605.

Exposure To Radio Frequency Energy

Your Midland radio is designed to comply with the following national and international standards and guidelines regarding exposure of human being to radio frequency electromagnetic energy:
- American National Standards Institute (ANSI)/Institute of Electrical & Electronic Engineers (IEEE) C95. 1-1992
- Institute of Electrical and Electronic Engineer (IEEE) C95. 1-1999 Edition
- International Commission on Non-Ionizing Radiation Protection (ICNIRP) 1998

To control your exposure and ensure compliance with the general population or uncontrolled environment exposure limits, transmit no more than 50% of the time. The radio generates measurable RF energy exposure only when transmitting.

IMPORTANT: Changes or modifications to this unit not expressly approved by MIDLAND RADIO CORP. could void your right to operate this unit. Your radio is set up to transmit a regulated signal on an assigned frequency. It is against the law to alter or adjust the settings inside the COMMUNICATOR to exceed those limitations. Any adjustment to your radio must be made by qualified technicians.
**BATTERY INSTALLATION**

Your LXT112 Series radio operates with 3 AAA alkaline batteries or a NiMH rechargeable batteries. The belt clip should be removed to ease installation or removal of the batteries.

To install the batteries:

1. With the back of the radio facing you, remove the belt clip (see diagram below) for easy access, then remove the Battery Cover by pressing down on the top center and sliding it down from the radio.

2. Insert 3 AAA batteries observing the polarity as shown on the Battery Compartment. Installing the batteries incorrectly will prevent the unit from operating or may damage the unit.

3. Return the Battery Cover by sliding it up on the radio. Replace the belt clip, making sure it locks into place.

**CHARGING THE BATTERY**

Your LXT112 Series is equipped for using rechargeable NiMH batteries which can be recharged by inserting the AC adapter into the radio charge jack. Initial charge time is 24 hours. Charge time is about 12 hours thereafter. For maximum battery life, we recommend charging the batteries when the low battery icon comes on. Remove the radios from the charger when the charge time expires.

- 1. Only use our NiMH batteries.
- 2. Do not attempt to charge alkaline batteries or any batteries or battery packs other than the one indicated in the manual. This may cause leakage and damage to the radio.
- 3. For long term storage of the radio, turn the radio OFF and remove the batteries from the radio.

**EXTERNAL SPEAKER/MICROPHONE JACK**

To use an optional speaker / microphone or headset:

- Insert the plug(s) into the SPK/MIC jacks
- Place the earbud into your ear, and adjust the mic into your desired position.
OPERATING YOUR RADIO
POWER ON/OFF AND VOLUME
Press the POWER/MODE button for at least 3 seconds to turn the radio
on/off. To increase/decrease the volume level, press the ▲▼ button
during RX or STANDBY mode. The VOLUME METER will indicate the
volume setting of the radio.

TRANSMITTING AND RECEIVING A CALL
1. For maximum clarity, hold the radio 2 to 3 inches from your mouth.
2. Press and hold the PTT button and speak in a normal voice into the
   microphone. The TX icon will appear continuously on the LCD Display
   while transmitting.
3. To receive a call, release the PTT button. The RX icon will appear on
   the display when your radio is receiving a transmission.

SCAN
Your LXT112 Series can scan all 22 channels for activity. To enter, quickly
press the SCAN button. Repeat the same procedure to exit. Your radio will
rapidly scan each of the 22 channels and stop on any active channel for 4
seconds before resuming scan. When you press the PTT button to trans-
mit on an active channel, the scanning function will stop and remain on the
active channel. To resume scanning, quickly press the SCAN button.

CALL ALERT
Your LXT112 Series can transmit a call alert. To send, press the PTT
button twice rapidly. The TX icon will appear while transmitting a call alert
and a tone can be heard on the speaker for confirmation.

KEYPAD LOCK
Press the LOCK button for 4 seconds. The “Lo” icon will appear on the
display. PTT will still be active. Repeat the same procedure to unlock the
keypad, a “LF” icon will appear on the display.

CHANNEL SELECTION (GMRS/FRS BAND)
Press the MODE button once, and then the ▲▼ buttons to select one of
the 22 GMRS/FRS channels. To confirm the selection, press the PTT
button or press the MODE button again to move to the next feature setting.
Note: To communicate between two LXT112 Series radios, all radios in
your group must be set to the same channel.

VOX
To turn VOX on, press the MODE button twice, the display shows “VOX”
blinking while below the “oF” icon appears. Select “on” by pressing the
▲▼ buttons and push the PTT key or MODE button again to confirm.
To turn VOX off, press the MODE button twice, the display shows “VOX”
blinking while below the “on” icon appears. Select “oF” by pressing the
▲▼ buttons and push the PTT key or MODE button again to confirm.
SPECIFICATIONS

Channels 22 GMRS/FRS Channels
Operating Frequency UHF 462.5500 ~ 467.7125 MHz
Power Source 3 AAA Alkaline or Rechargeable Ni-MH batteries

* Channels 8~14 are low-power FRS license free channels

ABOUT RANGE

Your LXT Series radios are designed to give you maximum range under optimum conditions.

Optimum Conditions are:
- Over water
- Open rural areas without obstructions
- Flat areas where you can see the other person

To ensure you get maximum range:
- Be sure to use fresh or fully charged batteries - low batteries will cause low power conditions
- Be sure you are on a GMRS channel - FRS channels are restricted by the FCC to low power
LIMITED WARRANTY

Midland Radio Corporation will repair or replace, at its option without charge, any Midland FRS/GMRS transceiver which fails due to a defect in material or workmanship within Three Years following the initial consumer purchase. This warranty does not apply to water damage, battery leak or abuse.

Accessories have a 90 day warranty from date of purchase, including any antennas, chargers, or earphones. This warranty does not include the cost of labor for removal or re-installation of the product in a vehicle or other mounting. Performance of any obligation under this warranty may be obtained by returning the warranted product, prepaid freight, along with proof of purchase to:

Midland Radio Corporation
Warranty Service Department
5900 Parretta Drive
Kansas City, MO 64120

This warranty gives you specific legal rights, and you may also have other rights, which vary from state to state.
Note : The above warranty applies only to merchandise purchased in the United States of America or any of the territories or possessions thereof, or from a U.S. Military exchange.
